THERAPY SERVICES

What is TCHATT?

Texas Child Health Access Through Telemedicine (TCHATT) provides FREE access to mental health services to students in participating school districts. The TCHATT program offers therapy interventions, medication management, resources, and mental health support.

How does TCHATT work?

With parent consent, the student is connected with a UTMB child and adolescent mental health clinician for an assessment followed by a limited number of visits.

How to use TCHATT?

Students can be referred to TCHATT through their school counselor.

Who can use TCHATT?

TCHATT is available to students ages 4-21 in participating ISDs. Students must actively be enrolled in the school district to be eligible for services.
